Zhe Yu

Research Assistant | Trustworthy Language Models and Agentic AI
B.Eng. Candidate in Artificial Intelligence | Expected 2027
HKUST (Guangzhou) | LAI Lab · Zhejiang University | IFRC Lab
zyu@zju-if.com · Homepage · Google Scholar · GitHub

Research Profile

Undergraduate researcher developing white-box and system-level methods for trustworthy language models and agents, with a focus on evidence attribution, representation–action dissociation, malicious skill detection, and multi-agent execution consistency.

Education

Communication University of Zhejiang **2023 – Expected 2027**
B.Eng. in Artificial Intelligence; advisor: Dr. Hao Zeng Hangzhou, China
Overall Average: 85.15/100

Research Experience

The Hong Kong University of Science and Technology (Guangzhou) **May 2026 – Present**
Research Assistant, LAI Lab; advised by Prof. Chengwei Qin Guangzhou, China

- Developed CAVERT for diagnosing and recovering from execution inconsistencies in multi-agent systems; formalized task duties and evidence conditions that distinguish corrected memory from compliant execution.
- Co-authored a survey of hallucinations across the reasoning lifecycle, connecting observable evidence and causal study designs to verification, repair, and release control.

George Mason University (Remote) **Jun. – Sep. 2026**
Research Intern; supervised by Prof. Simin Chen Fairfax, VA, USA

- Developed LatentTriad, a pre-action detector that probes declaration, operation, and boundary representations in a single prefill pass to identify malicious agent skills without executing them; studied robustness across skill sources and lexical decoys.

Binjiang Institute of Zhejiang University **Nov. 2025 – Present**
Research Intern, IFRC Lab; supervised by Prof. Meng Han and Dr. Wenpeng Xing Hangzhou, China

- Developed DISF and FIDES for white-box RAG reliability, and Composition Collapse for distinguishing stable factual knowledge from reliable compositional reasoning. FIDES and Composition Collapse were accepted at EMNLP 2026.
- Developed evidence-attribution, audit-planning, and evaluator-reliability methods; studied representation–action dissociation in Readable Before Actionable and Decodable but Unresolved.
- Within provincial and national key R&D programs, developed LatentAudit and RETINA-SAFE / ECRT for faithfulness monitoring and medical risk triage; both accepted at NeurIPS 2026 workshops. Contributed to privacy-preserving model ownership verification through ZK-FPE.

University of Malaya **Jan. – Feb. 2025**
Visiting Student Kuala Lumpur, Malaysia

- Contributed to a medical computer-vision project in collaboration with the medical school at the National University of Singapore.

Westlake University **Mar. – Sep. 2024**
Research Assistant; supervised by Dr. Ziyang Zhang Hangzhou, China

- Worked on parallel dual all-fiber interferometers for salinity and temperature sensing; the study was published in *Optics Communications* (2025).

Industry Experience

BoostEngine **Jul. – Oct. 2025**
R&D Intern, Full-Stack Development / AI Agents Hangzhou, China; remote with New York team

- Built a multi-brand Manifest V3 Chrome extension for TikTok Shop operations across 20 regional domains and 9 language packs using React, TypeScript, Vite, and Chrome APIs.
- Developed analytics services for 8,000+ creator collaborations and a FastAPI / Redis / MySQL synchronization system with anti-loop control, queue coalescing, monitoring, and alerts.

Academic Service

Reviewer: EMNLP 2026, NeurIPS 2026, AAAI 2027, ICLR 2027.

Awards and Technical Skills

- **Silver Award**, CCB Cup Zhejiang Provincial International College Students' Innovation Competition, 2024; project: *Scoliosis Detection AI System*.
- **Research:** Python, PyTorch, Hugging Face Transformers, scikit-learn, NumPy, pandas, FAISS, vLLM, W&B, MATLAB.
- **Engineering:** TypeScript / JavaScript, Java, React, FastAPI, Spring Boot, SQLAlchemy, MyBatis-Plus, MySQL, Redis, Docker, Chrome Extensions.
